

USN Racing Case Study: Scott Beaumont

Age: 39

Sport: Mountain Biking – 4x

Club: USN Racing

When do you use your KYMIRA?

“In every single training session and during every race. Without a doubt, I feel stronger and fresher in every session or every race due to the benefits KYMIRA’s kit gives me. Also during travelling as I am racing most weekends all around the World. KYMIRA ticks the box and I know that when I arrive in any destination I will be as fresh and energised as I can be.”

What are the key benefits you find when cycling?

“My sport is intense with 5 races per hour. Suffering from any kind of DOMS is not an option that you want to deal with. Before KYMIRA I had to deal with it, but now it is something that doesn’t cross my mind. Using KYMIRA has become as important as putting my helmet on!”

Do you find the kit helps more with performance or recovery?

“I would find it hard to separate the two out if I am being honest. I now use KYMIRA for training and racing and I find great benefits in both. In training, I know I am doing everything possible with my performance and equipment to make every difference. In racing, I need fast recovery and that one percent advantage over my competition. Kymira does that.”

Would you recommend KYMIRA?

“No question at all. Fantastic product that makes a performance difference at a price that makes it a no brainer.”
